

**Continuous Monitoring System
for Reef Aquariums**

Continuous Monitoring System for Reef Aquariums

With real-time data and analytics, the LaMotte Pulse® alerts you to emergency situations and empowers you to make informed decisions, ensuring your aquatic life thrives in the best possible conditions.

Features & Benefits

24/7 Continuous Monitoring

Stay in the loop on aquarium health around the clock. LaMotte Pulse® continuously sends data to the WaterLink® app.

Maintenance-Free Dissolved Oxygen

Track dissolved oxygen in real-time to support healthier aquatic life and maintain ideal conditions for growth and energy.

Free Ammonia Detection

Catch critical issues early and take action fast with direct detection of ammonia's most toxic form.

Medical-Grade Sensor Tech

Built with advanced medical-grade sensors that deliver fast, reliable readings.

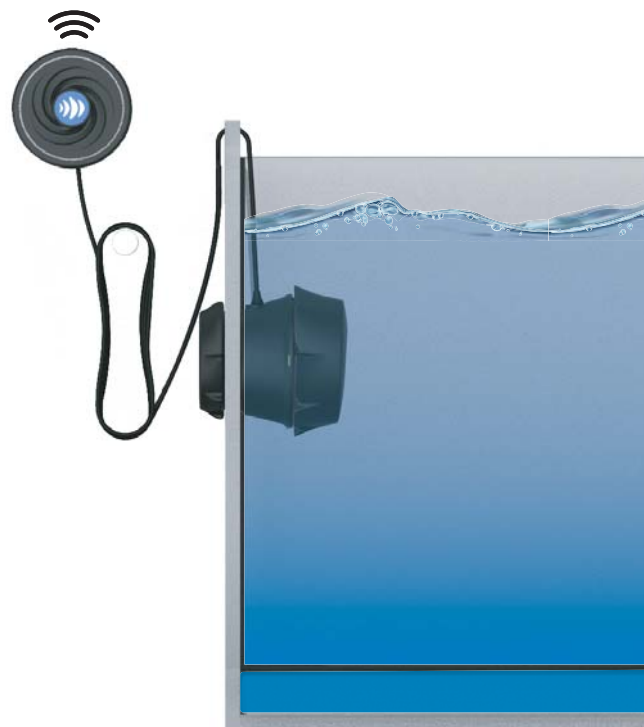

Streamlined Solutions with LaMotte PulseDisk®

No reagents. No waste reservoir. No tubes. Just one LaMotte PulseDisk® which measures continuously for 30 days.

What's Included

- Pulse Brain (Wi-Fi and Status Module)
- Pulse Heart (Sensor Module)
- Magnet Mount
- Power Adapter (120 VAC input, 12 V output)

Over 100 years of reliability and expertise in water quality analysis, trusted in professional aquaculture and environmental research.
